```
package Switch30Sept;
```

```
import java.util.*;
```

```
public class SmallestProgram {
```

```
    public static void main(String[] args) {
```

```
        Scanner input = new Scanner(System.in);
```

```
        System.out.println("Masukkan 3 angka:");
```

```
        int i = input.nextInt();
```

```
        int j = input.nextInt();
```

```
        int k = input.nextInt();
```

```
        int[] intArray = {i, j, k};
```

```
        Arrays.sort(intArray);
```

```
        System.out.println();
```

```
        System.out.println("Angka terkecil adalah " + intArray[0]);
```

```
    }
```

```
}
```

```
Masukkan 3 angka:
```

```
17
```

```
9
```

```
2006
```

```
Angka terkecil adalah 9
```

```
Masukkan 3 angka:
```

```
8008
```

```
8800
```

```
8080
```

```
Angka terkecil adalah 8008
```

```
Masukkan 3 angka:
```

```
21
```

```
21
```

```
22
```

```
Angka terkecil adalah 21
```
